General Terms and Conditions

The Contract comes into force by Enagic's acceptance

Replacement delivery:

In the event of lack of availability, or if the delivery is late or incomplete, no compensation will be payable except in cases of gross negligence. If the product is not available, Enagic may withdraw from the Contract; the Purchaser will be informed of this immediately. Any payments already made will then be reimbursed immediately. However, Enagic is also entitled to send a product which is of equal value in terms of quality and price. The right of revocation also applies for this product.

Due payment and default:

The purchase price is payable on delivery of the contractual acceptance. Without payment Enagic is not enforced to deliver products. The customer will be considered to be in default at the latest 30 days after the payment date without the need for any reminder. From the default date onward, Enagic can demand an administrative charge of € 10.00 for each reminder plus debt collection costs and late-payment interest. The product remains the property of Enagic until payment has been made in full.

Despatch costs:

The costs for shipping are charged to the customer separately.

Subsequent fulfilment:

As regards any possible claim to supplementary performance, Enagic reserves the right to refuse to repair defects if this would be excessively expensive. In this case, the purchaser is entitled only to the supply of an item free of defects.

Data protection:

The data needed to handle the transaction will be recorded in order to process the order, to maintain customer relations and for our own advertising purposes.
The customer may refuse to allow the latter at any time.

Revocation terms

Right of revocation:

You can revoke your contract declaration within two weeks without giving reasons, either in writing (e.g. letter, fax, e-mail) or by returning the item if this was sent to you before the end of the period allowed. The revocation period starts with the receipt of this statement of revocation terms in writing. Sending the revocation or returning the item in good time shall be deemed sufficient to comply with the revocation deadline. Revocation must be sent to Enagic Europe GmbH, 40210 Düsseldorf, Immermannstr.33.

Consequences of revocation:

In the event of an effective revocation, the goods and payments received on both sides must be returned and any benefits derived (e.g. interest) paid back. If you cannot return the goods or services received in whole or in part, or can only return these in a deteriorated state, you must make up the value, if applicable. This may also mean that you must also fulfil the contractual payment obligations for the time up to the revocation. If items were handed over, this does not apply if the deterioration of the item is only caused by your inspection of it, as you would do it in a shop, for example. Otherwise, you can avoid the obligation to reimburse the value for deterioration of the item caused by use for the intended purpose if you do not use the item as if it were your property and do nothing which would adversely affect its value. You must bear the costs of returning the item if the product delivered is what you ordered and if the price of the item to be returned does not exceed a sum of € 40.00 or, if the price of the item is higher, you have at the time of the revocation not yet made the payment or a contractually agreed part-payment. Otherwise, returning the item is free of charge for you. Obligations to reimburse payments must be met within 30 days. The deadline starts for you with the dispatch of the revocation declaration or the item, and for us with their receipt.

End of statement of revocation terms

* ATTENTION CUSTOMERS

As this machine is capable of generating 5 types of water, please use each mode in a balanced manner. If you keep using the machine mainly at “Kangen Water” mode, minerals such as calcium and magnesium originally contained in the tap water will build up inside the machine and cause clogging and degrading the performance of electrolyzing.

Although the machine cleans itself regularly, sometimes that is not enough especially in areas where condition of water is hard and high in minerals.

Please be sure to practice the below 3 measures to avoid possible machine problems caused by calcium clogging.

1. Use with the 2-stage Pre Filter (priced at EURO 50.00) to soften the water.
2. Use the Cleaning Unit at least once a month to clean inside the machine.
3. Switch to Acidic Water or “Beauty Water” mode (push yellow button) daily and let the water flow for about 1 minute.

*お買い上げ頂きましたお客様へ

本製品は5種類の水の生成が可能ですので、用途に合わせてそれぞれのモードをバランスよくお使いください。

主に「還元水」モードのみご使用で日常的に機械をお使いになった場合、元々水道水に含まれているミネラル分(カルシウム・マグネシウム等)が機械本体内(特に電解槽内部)に蓄積し、結果として詰まりや電気分解性能の低下を招く恐れがあります。本製品には定期的には自動クリーニンングを行う機能を備えてございますが、特に水質が硬水で、ミネラル分を多く含む地域では、これだけでは万全でない場合がありますのでご注意ください。

カルシウム詰まりによる機械の故障を防ぐため、対策として以下の3点を行ってください。

1. 2連フィルター(別売り EURO 50.00)をお使いになり、硬水を軟水化させてから機械本体に水を通してください。
2. クリーニンングユニットを使用すると電解槽等、機械内部の洗浄ができます。月に一度を目安にご使用ください。
3. 日常的に「酸性水」モード“Beauty Water”(黄色いボタン)に切り替え、
約1分程度通水して手動クリーニンングを行ってください。
